

Ultron Trough Greases

Ultron Trough Greases are designed to assist in easy release of dough from troughs for smoother processing. Our trough greases are manufactured in a state-of-the-art production facility using the latest and most sanitary methods for formulating, blending, and tracing, from the time the raw ingredients arrive to the time the final products are shipped.

Achieve Clean Releases

We source only the highest-grade ingredients and blend them to formulate our proprietary release agents. We work with you to ensure that, when used properly, they will provide the desired release every time.

Experience Confidence

Our production facility was built from the ground up to ensure only high-quality products leave through our doors. We've automated formulas and processes to make sure you get the exact release agent you need, when you need it, every time.

Formula #	Ingredients	Allergen-Free	Clean Label	Application
Ultron 380	Vegetable oil and food grade petroleum (USP/NF)	x	x	Trough lube
